**TO:** Human Resources

**FROM:** Janice Manning, Professor, School of Information Technology

**SUBJECT:** Letter of Recommendation for Anthony Merante

**DATE:** September 8, 2020

I am pleased to write this letter of recommendation for Anthony Merante to support his application for a position as a software developer.

Anthony is currently enrolled as a full-time student in the Computer Programmer Analyst (CPA) program at Fanshawe College in London, Ontario. Anthony has successfully completed Level 4 of the program and is on a work term this semester. I was Anthony's programming teacher for his Level 2 C++ course (INFO-1156) during the winter semester of 2019. This course was fundamental to his development as a computer programmer, and he achieved an excellent grade of A+ (90%). This past summer semester of 2020, I was Anthony's teacher for his Level 4 Software Design Patterns 1 course (INFO-3137), and he again achieved an excellent grade of A+ (96%).

As Anthony's professor in both W2019 and S2020, I observed him to be an exemplary student. Anthony attended all classes, was attentive during class, and was courteous and respectful in all his interactions with me. Anthony's evaluations, whether in-class or take-home projects, were always completed with excellence and in a timely way. His evaluations revealed a thorough understanding of the course material and extensive preparation. Anthony often extended his learning beyond the course material, demonstrating his independence and research skills and showing his curiosity for programming and software development. It was a pleasure to have such a dedicated and courteous student as Anthony in my classes!

I believe that Anthony is an excellent student and an outstanding candidate for a software developer position with your company. I highly recommend him for a position. If you require further information regarding Anthony, I can be reached at this email address:
